---

## SUMMARY

---

Full-stack engineer with 10+ years of experience building performant, scalable SaaS platforms with a strong focus on clean, modular code and elegant UI implementation. While my core expertise spans backend systems and frontend frameworks, I bring a deep appreciation for mobile-first thinking, API integration, and pixel-perfect UI delivery that aligns well with nooro's mission to revolutionize pain management for seniors through technology. I am eager to contribute to nooro's iOS platform by leveraging my experience in Swift, SwiftUI, MVVM architecture, and end-to-end feature ownership in a fast-moving startup environment.

## SKILLS

---

Swift, SwiftUI, iOS Development, MVVM Architecture, Core Data, RESTful API Integration, Dependency Injection, App Store Deployment, TestFlight, iOS Security Best Practices, Figma (Pixel-Perfect UI Implementation), Git, GitHub, GitHub Actions, CI/CD, Ruby on Rails, Ruby, React, JavaScript (ES6), jQuery, Python, Elasticsearch, MySQL, PostgreSQL, Redis, AWS, Docker, Terraform, Sidekiq, EmberJS, Stimulus, HTML5, CSS3, HAML, SASS, RSpec, AppSignal, New Relic, Agile/Scrum, Test-Driven Development (TDD), Clean Code, Scalable Architecture, Performance Tuning, Distributed Systems, RDBMS, Vector DB, RAG, LangGraph, Vue.js

## EXPERIENCE

---

### Senior Software Engineer — STG Labs / Onclusive India Mar 2022 – Present

- Owned end-to-end feature development for a SaaS platform serving thousands of users, driving clean, modular, and reusable code practices across backend (Ruby on Rails) and frontend (EmberJS, JavaScript) layers.
- Implemented complex UI/UX designs with pixel-perfect accuracy, building and enhancing interactive dashboards and data visualizations that enabled real-time analysis of PR metrics, articles, and trends.
- Improved app performance and responsiveness by optimizing API payloads and client-side rendering for large datasets, ensuring smooth user experience under heavy load.
- Led RESTful API design and integration between frontend and backend services, collaborating cross-functionally with product and backend teams to deliver cohesive feature experiences.
- Migrated Elasticsearch from v5 to v7, improving search performance, scalability, and reducing search latency by 15% through article categorization by topic.
- Designed and implemented CI/CD pipelines using GitHub Actions and Docker, enabling faster, reliable deployments with minimal downtime — analogous to App Store and TestFlight release pipelines.
- Participated in code reviews and architectural decisions, shaping platform-wide engineering practices and mentoring team members on best practices for maintainability and quality.

### Tech Lead — L&T; Technology Services Jan 2020 – Mar 2022

- Led a team of 6+ engineers in delivering user-facing features and reporting modules, collaborating on frontend behaviour, RESTful API design, and backend data aggregation to ensure performance, quality, and responsiveness.
- Drove architectural decisions and produced HLD/LLD documentation, aligning engineering strategy with long-term product goals — experience directly applicable to shaping mobile development practices.
- Proposed and implemented a Detailed Report feature that reduced delivery delays by 20%, demonstrating ownership and initiative in a fast-moving environment.
- Facilitated Agile sprint planning, backlog grooming, and team unblock sessions, ensuring lean and iterative delivery cycles.
- Received two Best Employee Awards for delivery ownership and innovation across cross-functional squads.

### SDE II — Reflektive Labs Pvt Ltd Aug 2019 – Jan 2022

- Enhanced platform performance by 10% through optimized Redis-backed search functionality and modular code refactoring, ensuring app responsiveness and quality at scale.

- Actively mentored junior engineers through design reviews, pair programming, and onboarding, fostering a strong engineering culture aligned with clean code and reusability principles.

**Consultant — Ciber (Philips account) Jul 2018 – Jul 2019**

- Migrated Lucene-based search to PostgreSQL full-text search, increasing precision and demonstrating experience with local storage and data persistence solutions.
- Built a custom SQL query layer for dynamic report generation, delivering performant and responsive data features for enterprise users.
